

Water (Aqua) – The main solvent and base of the conditioner, providing hydration to the scalp and hair.

Cyclopentasiloxane – A lightweight silicone that smooths and softens the hair, adds shine, and helps with detangling.

Dimethicone – Another silicone-based ingredient that provides smoothness, reduces frizz, and enhances hair's texture.

Glycerin – A humectant that draws moisture into the hair, helping it stay hydrated and soft.

Cocamidopropyl Betaine – A mild, coconut-derived surfactant that helps cleanse the scalp and hair without stripping moisture.

Sodium Chloride – A thickening agent used to adjust the viscosity (thickness) of the conditioner.

Panthenol (Pro-Vitamin B5) – A moisturizing and conditioning agent that strengthens hair, improves elasticity, and adds smoothness.

Hydrolyzed Silk – A protein that penetrates the hair shaft, strengthening and hydrating the hair to restore its natural smoothness.

Niacinamide (Vitamin B3) – Improves circulation in the scalp and helps support overall scalp health, promoting an environment conducive to hair growth.

Menthol – Provides a refreshing, cooling sensation that helps soothe and invigorate the scalp, enhancing the overall experience.

Tocopheryl Acetate (Vitamin E) – A potent antioxidant that helps protect the hair and scalp from oxidative damage and environmental pollutants.

Polyquaternium-7 – A conditioning agent that helps smooth the hair, reduce static, and make hair more manageable.

Citric Acid – Used to adjust the pH of the conditioner, ensuring it matches the natural pH of the scalp and hair to prevent irritation.

Methylisothiazolinone & Methylchloroisothiazolinone – Preservatives used to protect the formula from bacterial and fungal contamination, ensuring product stability and safety.

Fragrance (Parfum) – Adds a pleasant scent to the conditioner for a refreshing experience when applied.
