

MAVALA

SAFETY DATA SHEET

903.12

Last Revision: 08.06.16

1. General Data

Mavala Article Number:	903.12
Product Denomination:	MAVALA STOP
Purpose:	Prevention from nail biting

2. Ingredients (INCI)

Ethyl Acetate
Alcohol Denat
Phthalic Anhydride/Trimellitic Anhydride/Glycols Copolymer
Butyl Ester of PVM/MA Copolymer
Butyl Acetate
Acetyl Tributyl Citrate
Sucrose Octaacetate
Denatonium Benzoate
Isopropyl Alcohol
Benzophenone-1
D&C Violet No. 2 (CI 60725)

3. Components and Special Hazards

None

4. Components of Bovine Origin

None

5. Hazards Identification

Acute Oral Toxicity:	Slightly Toxic
Skin Contact:	Non irritant
Eye Irritation:	Irritant
Inhalation:	Inhalation for long period may cause dizziness.

6. First Aid

Eye Contact	Thoroughly rinse with water
Skin Contact	Remove with "Nail Polish Remover" and wash with soap and water
Ingestion	On accidental ingestion of small amounts, call a physician.
Inhalation:	Move to fresh air.

SAFETY DATA SHEET

903.12

Last Revision: 08.06.16

7. Fire Hazards

Inflammable Flash Point < 21 °C)
Handle in well ventilated areas
Keep away from open flames
Keep the container tightly closed

8. Precautions of Use

External use
Avoid contact with eyes

9. Physical and Chemical Properties

Appearance:	Clear, light purple, slightly viscous liquid
Odor:	Typical of solvents
Taste: (dry):	Bitter
Density:	0.92 – 0.94
Solubility in Water	Insoluble
Vapor Pressure:	NA
Volatile Organic Compounds:	Ethyl acetate, Butyl acetate, Isopropyl Alcohol, Alcohol Denat.
Dry Residue:	17 – 19 %
pH:	NA
Viscosity (Brookfield LV1):	15 – 25 mPas
Stability:	Stable

10. Stability

Stable at least 3 years under normal storage conditions

Dr. E. Steiner, Manufacturing Director
