

Ingredient Spotlight

Epigallocatechin Gallate

- *Also known as ECGC*
- *A key component of green tea*
- *Potent antioxidant capabilities*

Willow Bark

- *Plant extract with skin-soothing + antioxidant benefits*
- *Contains beneficial salicin, polyphenols + flavonoids*
- *Also goes by the name Salix alba or Salix nigra*

Tocopheryl Acetate

- *Also referred to as tocopherol acetate*
- *One of many forms of vitamin E*
- *Offers anti-aging benefits due to its antioxidant properties*

How To Apply

Use as the last step in your AM skincare routine. Apply liberally 15 minutes before sun exposure. If you don't apply liberally, you will need to reapply every two hours after your skin is exposed to direct sunlight. If you plan to swim or perspire you must apply a water-resistant sunscreen.
