

Dear furkid parents,

Thank you for purchasing our **Tomkas** pet sling!

To fit the different sizes of pets, an unclosed opening is designed. It allows you to put pets in and take them out easily. In addition, large opening and soft cover make pets feel relaxed. We don't recommend narrow and closed carriers because they force pets to curl into a ball and bring uncomfortable feelings.

If you are satisfied with our TOMKAS sling carrier, please write a review that promotes publicity. For example, you can note the type and weight of pet, your height and figure, and your use experience. You can also attach some videos and pictures. We sincerely hope to see your lovely pets in videos and pictures. If there is any problem, please contact us. We promise to try our best to help you.

Please carefully read the rear instructions in order to ensure the correct use of TOMKAS sling.

Best regards,

TOMKAS

How to correctly use the product:

1. Do not directly use the **TOMKAS** sling and make your pets familiar with it first, because some sensitive pets will be nervous about strange things.

Suggested method: put their favorite toys into Tomkas sling and make them stay in it. In addition, offer furkids some delicious food until they get used to it. Please wait with patience due to different time incurred by diverse characters.

2. It is easy to put your furkids in or take them out after they are familiar with TOMKAS sling. Make sure to connect the safety buckle to the harness or collar, which can prevent your pets suddenly jumping out of the pet sling carrier. Please touch your pets gently to make them relaxed in order to help them adapt to it well.

3. Take your pets to anywhere they like after you verify that they don't resist TOMKAS sling and they like this feeling. For example, you can walk, shop, take the subway, travel and even cook with your pets. For those clingy furkids, you don't worry about their nervousness caused by separation any more.
