GEAR LINES

Blistering heat to bitter cold. Whatever the climate, whatever the conditions, Under Armour® Performance keeps athletes comfortable, dry, and light with gearlines engineered to perform.

heatgear™

HeatGear®, the original 'second skin' layer, sparked the revolution of performance apparel and made cotton T-shirts obsolete.

coldgear™

ColdGear® wicks moisture from the skin and circulates body heat, keeping athletes warm, without weighing them down.

allseasongear™

AllSeasonGear® fabrics flex with changing conditions to deliver core temperature regulation and maximum breathability.

COLDBLACK®

Most fabrics – especially dark colors – heat up and become unbearable in the blazing sun. Well, no more. Revolutionary coldblack® technology makes dark colors act more like light colors, and light colors act like nothing else. It also has the benefit of protecting your skin from sun damage.

coldgear™ INFRARED

Coating on the inner layer of your garment absorbs and retains your own body heat, so you stay warmer longer... with no extra weight or bulk.

UNDER ARMOUR® SCENT CONTROL

Under Armour's exclusive scent control technology traps and suppresses growth of odor bacteria, recharges better and works 10x longer than carbon, and is quieter and lighter than carbon.
