Highlights / Notes on key ingredients:

- Alcohol Denat. acts as a solvent and evaporates quickly, aiding in spray-delivery and product drying. [INCIDecoder+1](#)
- VP/VA Copolymer + VA/Crotonates/Vinyl Neodecanoate Copolymer are film-forming resins that help provide hold and buildable texture. [skindimensionsonline.com+1](#)
- Calcium Sodium Borosilicate, Zeolite and Cyclodextrin are listed as absorbent/mineral-type ingredients that help with oil absorption and delivering a “lived-in” texture. [INCIDecoder+2Ulta Beauty+2](#)
- Free from silicones, sulfates, phthalates and parabens (according to the product claim) — making it suitable for color-treated hair.
-
