

## TRUSCULPT® 3D PATIENT TESTIMONIALS

"truSculpt 3D truly exceeded my expectations. Within the past few years, I have lost 20 pounds. I was left with a stubborn belly bulge and loose skin. After the first treatment, I can look down at my tummy and I see less of a bulge! Not only did I see a reduction in size, but the skin in my lower abdomen is tighter and smoother. The treatment itself felt like a hot stone massage. I experienced little to no discomfort and had no downtime. I can't wait to start treating other parts of my body with this device!"

"After delivering two children by C-section, I had fat and loose skin on my abdomen. I decided to try truSculpt 3D because I was looking for a treatment that could address my concerns without downtime. The truSculpt 3D treatment was quick and easy to tolerate throughout the entire procedure. Now at 12 weeks out, I see a noticeable difference in my abdomen – my pants fit better and my skin even looks better. truSculpt 3D is a great treatment for busy people who are looking for improvement without the downtime and headaches of surgery."

"For a no downtime procedure, I achieved results that I was not able to get with diet and exercise."

"I am so happy that I decided to do truSculpt 3D. I have two kids and workout, but have stubborn love handles. That is one area that I have the most trouble with. It was a painless treatment, and didn't take long at all, one hour. They treated my upper and lower flank areas. I was thrilled when I went back 3 months later and took my after pictures. Now I don't have that 'muffin top' over my pants."

"I was a little skeptical, but now I am very impressed with my results. TruSculpt 3D gave me back my confidence! Treatment was painless and fast. I am now looking forward to planning the next area that I want to have treated!"
